

## Our Developments

We have made India's first Vertical Double Door Plant.

We have introduced technology of making looking glass mirror by aluminium coating and developed India's first Glass Mirror Coater.

To improve cycle-time of our plants, we developed & introduced Booster Vacuum Pump.

We have made India's Biggest Plant, having 72 inch chamber diameter.

We have made India's first UV Lacquering system

India's biggest DP of size 40 inch diameter.

We have introduced Computerization

Our Baffle Valve design is unique. . .  
If we keep all other parameter same in comparison of other's, even then cycle-time of our plants will be less than about 30 %.

Introduced imported Rotary & Booster Pumps in our plants.

Automatic Coating Sequence in metallising plants.

In-built, compact control panel, to save floor space, ease of operation & maintenance of wiring etc.
